

Claims

What is claimed is:

1. A collection container for used medical devices comprising:
 - (a) a flexible base defining at least one aperture; and
 - (b) at least one flexible wall coupled to the base, the at least one wall defining an opening in the container.
2. The collection container of claim 1, wherein the at least one aperture is configured to allow passage of fluid.
3. The collection container of claim 1, wherein the container is foldable.
4. The collection container of claim 1 further comprising at least one handle coupled to the container.
5. The collection container of claim 1 wherein the base and the at least one wall comprise a flexible plastic comprising polyethylene and polypropylene.
6. The collection container of claim 1 further comprising a sterile packaging configured to receive the collection container.
7. A collection package for the collection of used medical devices, comprising:
 - (a) a collection container comprising:
 - (i) a flexible base defining at least one aperture; and
 - (ii) at least one flexible wall coupled to the base, the at least one wall defining an opening in the container;

and

- (b) a package configured to removably receive the collection container, the packager further configured to maintain sterility of the collection container before removal.

8. The collection package of claim 7, wherein the at least one aperture is configured to allow passage of fluid.

9. The collection container of claim 7, wherein the container is foldable.

10. The collection container of claim 9, wherein the package is configured to receive the collection container in a folded configuration.

11. The collection container of claim 7 further comprising at least one handle coupled to the container.

12. The collection container of claim 7 wherein the base and the at least one wall comprise a flexible plastic comprising polyethylene and polypropylene.
